

Brian Love

<http://brianflove.com> | brian@brianflove.com | 720-620-5852

I am a driven front-end developer with fullstack and business management experience.

I have spent the last 8 years leading a small company as the CTO where we have grown a company to \$5m in revenue. I lead a small team of developers using agile methodology to create technical solutions.

Experience:

- Front-end JS: 10y+
- Angular: 2y
- Angular 2: ~1y
- Node.js with Express: 1y
- TypeScript: 1y
- LESS and Sass: 2y
- SQL (TSQL and MySQL): 10y+
- MongoDB with mongoose: 1y
- Jekyll: 2y
- REST: 4y
- Apache and IIS: 10y+
- AWS: 4y
- JIRA: 3y

What makes me unique:

I understand business and can align technical solutions and strategies with business objectives, both short-term and long-term.

Why you should hire me:

- I will work my butt off.
- I am passionate about front-end development and user experience.
- I am comfortable working in an agile environment.
- I am an excellent communicator.

Work Experience:

- CTO, Webucator Inc. 2008-present.
- Web Integration Specialist, Hamilton College. 2005-2008.

Education:

- M.B.A
State University of New York Polytechnic Institute, 3.8
- BS in Computer Information Systems
State University of New York Polytechnic Institute, 3.6

Accomplishments:

- Webucator was on the Inc. 5000 list for 3 years.
- I designed and built an internal CMS for Webucator. It runs a \$5m company with hundreds of trainers and thousands of clients.
- Launched (a failed) app on iOS, Android and Facebook (Flash) with a fantastic team of developers at Electrotank (now High 5 Games).
- I am proud of my blog (brianflove.com) where I write about topics such as: Angular, TypeScript, the MEAN stack, JavaScript and more.
- I also volunteer for the Boy Scouts of America where I work with a team to develop the Western Region website (western.aa-bsa.org) as well as managing an e-commerce website (tradingpost.aa-bsa.org).
