Brian Love is a Software Architect, Google Developer Expert, and co-founder at Polaris, where he is building developer tools for a more performant and reliable internet.

I enjoy learning, speaking, and writing about software and technology. I co-authored "Why Angular for the Enterprise" for O'Reilly. When not coding, I enjoy skiing, hiking, and being in the outdoors.

Skills:

- Leadership & CTO
- Full stack web application development
- Software architecture
- Web application performance analysis and improvement
- Cloud application development
- User experience design
- Software testing
- Serverless and Infrastructure as Code
- DevOps & AWS

What makes me unique:

I have leadership and business experience and can align technical solutions and strategies with business objectives, both short-term and long-term.

Work Experience:

- 2022 - present: Co-founder, Polaris
- 2019 - present: Principal Architect, LiveLoveApp
- 2018 - 2019: CTO, BrieBug Software
- 2017 - 2018: Freelance Software Engineer, Self-employed
- 2009 - 2017: CTO, Webucator, Inc
- 2005 - 2009: Web Integration Specialist, Hamilton College

Education:

- M.B.A
  State University of New York Polytechnic Institute, 3.8 GPA
- BS in Computer Information Systems
  State University of New York Polytechnic Institute, 3.6 GPA

Accomplishments:

- Google Developer Expert in Web Technologies and Angular.
- Co-founder of Polaris, where we build developer tools for a more performant and reliable internet. Our SaaS solution enables developers to establish clear objectives for the performance and reliability of applications through measuring and monitoring real users with real-time notifications.
- Principal software architect for multiple software projects and teams.
- Provided enterprise software consulting to Fortune 100 companies.
- Analyzed and improved web application performance at ClickUp, FedEx, and Maxar Technologies.
- Migration of legacy systems to cloud ready applications at Santander, Hach Company, and Scopeworker.
- Training and consulting at Slack, Fidelity Investments, Fender, M&T Bank, Mosaic Financial, and Synapse.
- User experience design sprints and software development at ATC.
- Webucator was listed on the Inc. 5000 list for 3 years.
- Contribute to the web development community through podcasts, writing, and speaking. I have spoken at local meetups across the country and at web technology conferences in the US and Europe focusing on progressive web applications, web performance, build tools, software architecture, and mobile development.

Companies I've worked with:

FedEx – Fidelity Investments – Slack – Santander Consumer USA – Maxar Technologies – Hach Company – Dicks Sporting Goods – Fender – ClickUp – M&T Bank – Mosaic Financial – Scopeworker – Synapse – BenchSights – ATC
